## Current Study Information

BSc Computer Science—3rd year

University of Pretoria

## Work Experience

- Teachme2 (086 183 2246), 2013—now. Tutor for maths, physics and computer science—part-time.

## Skills

- Strong work-ethic
- Will not rest until the job is done
- Problem-solving for complex systems
- Well-versed in most programming languages
- Able to pick-up and understand concepts with minimal effort
- Leadership—am able to take control of situations and solve problems

## Preferred Responsibilities

- Team-leader
- Debugger and coder
- Logic designer

## Personal Motivation

Computers have always been a passion of mine, from the hardware components down to the programming of the most basic features in use everyday. Therefore, I will work hard to solve what ever computer related problem comes my way; I am an excellent problem solver and can see the best route through a complex system with minimal effort. I have a great work-ethic and if there is a concept I do not understand, I will grasp it. I am hard-working almost to a fault and will do my best to prove that.
